## Adult Education Programme

### **Course Description: Learn to Crochet - Beginners**

Being able to crochet is a valuable skill. As like all crafts, it changes with time and gets to look more modern despite its ancient and simple techniques. More and more people enjoy decorating their houses with handmade crafts. They enjoy wearables that stand the test of time, as something that's handmade takes time to make. Often its quality is superior to those bought in the shop, that were machine made or in a factory.

It's an art in itself to take a ball of wool and create it into something new and exciting. Many find this hobby relaxing and alike to mindfulness. And who doesn't like gifts that someone put their heart and soul into?

### **Aims of the course:**

- Learn to perform most basic crochet stitches
- Create simple household items and gifts i.e. dishcloths, coasters, baby blankets, hats (list is not exclusive to those and may change depending on what participants would like to make and enjoy making)
- Be able to read and follow a written pattern to create crochet art

### **Materials required:**

- 5mm crochet hook
